U. S. *Army.*
The regular army of the United States was increased during the war periods preceding the first world war by a volunteer army with its own organization. During the civil war this army was conscripted by the states and the regiments were known by the names of the states. These are entered in this catalog under their names *e. g.*, Connecticut. Infantry. The army of the Spanish-American war known as the volunteer army is distinguished in this catalog from the regular army by the addition of the word volunteer in the name, *e. g.*, U. S. *Army. 1st cavalry (Volunteer)*

In the civil war the colored regiments had a distinct organization and were numbered separately.

Entries for the colored and volunteer regiments are filed immediately after the regular regiments having the same number.

U. S. *Army. A. E. F., 1917-1920.*

The American expeditionary forces is a term used to describe the overseas forces during world war I and is used in an abbreviated form as a subheading under the army. It was organized in May 1917, with Major General John J. Pershing as commander-in-chief. This force abroad had an organization of its own, separate and distinct from the organization of the army, with its Air force, Engineer dept., General staff, etc. These units are used as subdivisions of the A. E. F. The armies and their divisions which made up the A. E. F. were numbered as parts of the army as a whole. By General order of the War dept. the American expeditionary forces passed out of existence on Aug. 31, 1920.

[1]

U. S. *Army map service.*

A. M. S. 1101–

Washington, 1942–

maps (part col.) various sizes.

Scale varies.

"A. M. S. series numbers are comprised of four digits. The first digit, which may be either a numeral or a letter, identifies the continental area or theater area in which the series falls. The second digit, a numeral, indicates the approximate scale of the series. The third digit, a numeral, designates the regional area or country area (as represented on the theater area index map) for which the series offers coverage. The fourth digit, also a numeral, differentiates series which are similar as to scale and coverage."—*Its* General map catalog, 1945, 3d prelim. leaf.

In arranging series entries, continental area numerals precede theater area letters.

Annual report. 1941/42–
[Washington, U. S. Govt. print. off., 1943–
v. illus., diagrs. 28½cm.
Report year ends June 30.
"Although the Services of supply came into existence on March 9, 1942, and operated only during the last third of the fiscal year, this report contains material that in good part covers the entire year. This has been done because so many parts of the Services of supply represented units that had functioned previously in some other setting."—1941/42, p. iii.

(Card 2)

CONTENTS.—1. The sampling of coal in the mine, by J. A. Holmes. 1911.—2. The escape of gas from coal, by H. C. Porter and F. K. Ovitz. 1911.—3. Specifications for the purchase of fuel oil for the government with directions for sampling oil and natural gas, by I. C. Allen. 1911.—4. The electrical section of the Bureau of mines: its purpose and equipment, by H. H. Clark. 1911.—5. The constituents of coal soluble in phenol, by J. C. W. Fraser and E. J. Hoffman. 1912.—6. The rate of burning of fuse as influenced by temperature and pressure, by W. O. Snelling and W. C. Cope. 1912.—7. Investigations of fuse and miners' squibs, by Clarence Hall and S. P. Howell. 1912.—8. Methods of analyzing coal and coke, by F. M. Stanton and A. C. Fieldner. 1912.—9. The status of the gas producer and of the internal-combustion engine in the utilization of fuels, by R. H. Fernald. 1912.—
